How Sub-Zero preservation foils wine's natural enemies:

BLOCKS HARMFUL RAYS

The UV-resistant glass shields wine, inhibiting development of unpleasant flavours and aromas.

DEFEATS HEAT

Independent zones maintain the preferred cool environments for reds and whites, ensuring they can be stored and served at their optimal temperature.

DAMPENS VIBRATION

Easy-glide racks gently cradle bottles, offering easy access with minimal disruption. The dessert wine rack accessory comes with the same protective feature.

CONTROLS HUMIDITY

Dual evaporators maintain steady, moderate humidity, ensure corks stay supple and labels do not peel.
