

GAGGENAU

Cooktops and extractors

Gaggenau cooktops and extractors do not just look the part; designed with performance, discretion and aesthetics in mind, they are inspired by the professional kitchen.

Cooktops and extractors 200 series

Professional demands, private space

With controls conveniently situated on the appliance the cooktops 200 series offers the private chef a concentrated area to create the extraordinary, with ventilation to match. Tailor your cooktop to your ideal culinary scenario by seamlessly joining together our modular options from the Vario cooktops 200 series.

Cooktops range from 28 cm to 90 cm, in flush- or surface-mounted, gas, flex induction or glass ceramic, interspersed with downdraft, a table ventilation, hoods, canopy or ceiling ventilation. All are designed to perform exceptionally, to professional standards.

Flex induction cooktop with integrated ventilation system 200 series

Table ventilation 200 series

All you see is clarity

The open kitchen concept, whereby the kitchen and living space become one, demands exceptional ventilation, however a large extractor doesn't necessarily fit the design aesthetic of your entertainment space.

Embedded within the worktop, the table ventilation 200 series is situated along the top edge of your large induction cooktop, the Gaggenau Black appliances blending into one. Unseen until it emerges, the extractor's discretion continues; it is transparent glass. Clearing the air and revealing the view of the cooktop, it even enlightens with ambient illumination.

80 or 90 cm wide and flush-mounted, it harmonises with our large, frameless, induction and full surface induction cooktops. Using innovative Guided-Air technology it ventilates the entire cooktop. Home Connect enabled and controllable via the cooktop it detects and removes vapour, even after cooking, allowing you to concentrate on the cuisine.

Flex induction cooktops with integrated ventilation

The complete cooktop

The flex induction cooktop with integrated ventilation system provides automated flexibility. An impressive 80 cm wide, it offers four cooking zones that can be combined into two larger ones. The cooking sensor and frying sensor enable accurate regulation of the temperature within the pan and gentle heating during frying. Everything is operated via the removable magnetic Twist-Pad control, in stainless steel for the framed option or in black for the frameless.

Added to this is its ventilation capability. Set to automatic, its extractor is capable of self-adjust according to the atmosphere, quietly removing vapour and odours at source.

Integrated ceiling ventilation 200 series

Extraction from above

The integrated Light Bronze rim extractor lies flush, within the ceiling, recirculating or extracting the kitchen air. All ceiling extractors are easy to control via remote control, from a suitable cooktop, via Home Connect or can be set to operate automatically.

The surface-mounted extractor is easily installed onto the ceiling, with no requirement for ducting or ceiling preparation. Its minimalist brushed finish in Gaggenau Light Bronze complements any kitchen design while it filters and then circulates the air.

The Gaggenau Black free hanging lift hood allows you to keep the extractor out of your line of sight, until needed. Then it can be lowered closer to the cooktop. More than a piece of theatre, this enables more focused air filtration and lighting, as well as easier access to filters.

Ventilation as a statement

Centrepiece of the kitchen

The island hood is impressive. Contained within the stainless steel and Gaggenau Anthracite glass frame lies the recessed filters, dishwasher-safe grease filter, low noise fan and dimmable lights. Set it to automatic and simply concentrate on your cooking. A wall-mounted option is also available at the same 90 cm width.

Art on the wall

An angled wall-mounted extractor in Gaggenau Anthracite glass matches your ovens, is out of the chef's way, yet very much a 90 cm wide design element.

Able to circulate or externally vent the air using dishwasher-safe filters, their design ensures they capture more vapour at lower power and noise levels. They can be manually or cooktop controlled or set to automatic: adjusting themselves depending on the fumes detected while lighting can fully illuminate or set the mood, artfully.

Hidden extractors

Discreetly effective

The flat kitchen hood is an intelligent, space-saving solution, sitting within the confines of a 60 cm or 90 cm width niche. Invisible and quiet, it provides dimmable lights, three power levels, automatic function and glass screen, extends beyond the cupboard when needed.

The canopy extractor is another powerful integrated option whenever space is at a premium. The quiet motor can be completely enclosed within the kitchen furniture while the easy-to-clean glass cover and dimmable illumination are all encased in stainless steel, hidden from view.

For the private chef with professional tastes. The 200 series.

Vario cooktops and extractors 200 series

Grand culinary ambitions, enabled

The range of Vario options enables a truly bespoke, personalised kitchen. As much about aesthetics as scale, the Vario 200 series distinguishes itself through its anodized aluminium, black control panels incorporated into the cooktops and uniform rectangular shape of the Vario appliances.

For the gas-centric chef, mechanically controlled power regulation precisely controls the nine levels of heat, ensuring replicable results.

Aspiration, circulation and extraction

Since 1976, our downdraft ventilation has quietly outperformed its small size. Our current 15 cm wide model is able to extract or circulate, automatically if preferred. Larger extractors in the 200 series include wall-mounted and island hoods, ceiling ventilation, flat kitchen hoods tucked into kitchen units and the invisible canopy extractors. There is a 200 series option that complements your kitchen.

Vario flex induction and downdraft ventilation 200 series

Vario configuration: gas cooktop, flex induction, Teppan Yaki and downdraft ventilations 200 series

Vario configuration: Teppan Yaki, flex induction, electric grill and downdraft ventilations 200 series

Design your cooking area

Create directly on the heat

The kitchen powered exclusively by electricity and the chef with a penchant for cooking without pans will be drawn towards the stainless steel Teppan Yaki and the electric grill's two separately controlled zones. The Teppan Yaki gives the thrill of speed frying at 240 °C or it can provide a gentle warming plate, quickly becoming your cooktop of choice. In either case, the quietly powerful downdraft ventilation will clear away any excess vapours from the atmosphere.

Clear the air from the worktop

The downdraft ventilation now offers a larger, wider, easier to clean, opening of 15 cm width to remove more air, a more effective double filtration surface and compact ducting to work quietly unnoticed in the kitchen unit. The automatic function with an air quality sensor enables the quietest, most efficient automatic removal of steam and odours without your intervention, allowing you to concentrate on the cuisine.
